

Commended

Technocover has been named as a runner up at this year's Morgan Est Supply Chain Conference and Awards. Held at the Ricoh Arena, the event honoured the commitment and dedication shown by the company's supply chain in the past year.

LPCB approved security product supplier, Technocover was recognised for an initiative relating to work on a Scottish Water project to deliver a programme of security access upgrades to 1500 potable water sites.

For this, Technocover used its modified Kawasaki Mule all terrain vehicle. Developed for previous projects, the mule enables safer working practices, saves time, money and helps ensure compliance with manual handling regulations.
